

Cable Solutions for 400G Optics

High Performance MPO-16 Cables

Opticlarity offers one of the highest port density optical cable products in the industry, specifically designed for high-capacity communication applications.

These connectivity products provide low insertion loss and high return loss guaranteed over a wide operating temperature range. Each cable is individually assembled, tested and packaged with detailed optical performance data.

There are a wide selection of connector types, jacket styles, and lengths available.

Features

- QSFP28-DD/OSFP application
- High packing density
- Various body and boot options
- Low insertion loss
- Industrial operating temperature range
- Volume production
- Flexible packaging
