

Cell Tower Cable Solutions

Optical Power + Electrical Power in ONE Cable

OptiCLARITY offers a wide variety of cable solutions to cell tower applications. IP-ONE integrates electrical power connection and optical power connection into a single cable that simplifies cable installation and maintenance at one antenna tower location in a cost-effective manner.

This two-in-one feature also makes POE connectivity extending to a long distance possible without the need for local power supply for repeater as the cable has a dedicated 12AWG cable handling up to 930 watts of DC power.

Features

- Integrated optical cable + electrical cable
- IP-68 rated housing for both indoor and outdoor applications
- 2 x 12 AWG cable
- Low loss MPO or LC optical connector interface
